

PriceSmart, Inc. is an operator of membership depository clubs in Central America, the Caribbean, and South America.

My participation in the project:

I worked for this company and participated in the development of the ecommerce project since 2020, in the development of the design, programming, configuration, and maintenance.

aeropost.com

Aeropost is a global e-commerce and logistics provider focused on solving the challenges of cross-border shopping and shipping in the Caribbean and Latin America. With operations in more than 30 countries and transporting hundreds of millions of dollars worth of merchandise annually from the US, our goal is to improve the lives of communities through safe and hassle-free online shopping experiences while We revolutionized the cross-border freight forwarding industry.

My participation in the project:

I worked for this company and participated in the development of the ecommerce project since 2017, in the development of the design, programming, configuration, and maintenance.

The image shows a collage of screenshots from the Aeropost.com website. At the top, the header includes the logo, navigation menu (ELECTRODOMÉSTICOS, ELECTRÓNICA, VIDEOJUEGOS, MODA, HOGAR, EXTERIOR, MASCOTA, DEPORTES), and a search bar. A prominent banner features a woman on a couch with the text 'Comprar casi todo' and the Amazon logo. Below this, there are sections for 'Productos en tendencia en aeropost.com' with a '\$50.00' price tag, and 'Opciones de pago' showing various payment methods like PayPal, Visa, and Mastercard. Another section highlights '¿Precio final-final?' with a list of inclusions: Precio del producto, Envío internacional, Aranceles e impuestos, and Entrega local. A large illustration shows a hand holding a smartphone with 'PAY' on the screen, surrounded by payment icons. At the bottom, a blue banner encourages users to 'Comience a comprar en los Estados Unidos o localmente' with a '¡Comprar ahora!' button. A yellow and blue banner at the very bottom states '¿Conocés nuestro mejor beneficio? Precio todo incluido. Así es, sin cargos ocultos. Lo que ves es lo que pagás.'

This image shows a product detail page for an Apple iMac 27" Core i7 4GHz 32GB RAM 512GB SSD MK482LL/A All in One Computer. The page includes a large image of the iMac, the product title, price (USD \$1,203.37), and an 'AGREGAR AL CARRITO' button. Below the price, there are details about delivery (Entrega Estimada: 22 - 23 de agosto) and a return policy (32 Puntos de Recolección & Entrega a Domicilio Disponible). The page also features a 'Descripción' tab and a table of technical specifications.

Modelo	Apple	Processor Speed	4
Unit Of Measure	GigaHertz	Processor Series	A Series
	32	Computer Memory Size Unit Of Measure	GB
	Mac	Hardware Platform	Mac
	Mac	RAM Type	DDR3 SDRAM

WHY POSS ?

WORLD LEADER IN QUALITY SEPARATION SOLUTIONS SINCE 1978

It's all what we do, and we do it all

POSS machines run over 1,250,000 lbs of turkey in North America alone, every HOUR, every DAY.

- Rugged and Reliable, no Pre-breaker grinders required
- Highest YIELDS, processing volumes & optimal texture
- Industry leader in USDA ground turkey, MSC and bonny trim
- Smallest footprint, horsepower requirement, screw RPM & temperature rise
- Processing capacities from 250kg (500 lbs) to 22,000 (50,000 lbs) per hour

ABOUT US

OUR STORY

Warner Ross developed the POSS mechanical separator technology in the mid 1970's and POSS Design Limited was formed in 1978. Driven by industry demand for reliable and consistently high performance in meat recovery, continuous advancements were made and over a range of mechanical separation configurations have been developed to meet an increasingly diverse series of separation applications.

POSS has been marketing this proven line of mechanical separators in 1978, and over has more than 1,400 machines running in more than 68 countries worldwide, 300+ installations in the USA alone, and a well-recognized client base of heavy high volume poultry processing plants. POSS is truly the Global Industry Leader in Quality Separation Solutions.

The majority of these machines are designed to process conventional chicken mechanical deboning, following manual and automated poultry cut-up lines.

The remainder were used for pork deboning and beef shanks de-boning, as well as various niche applications including fish, pork trim de-boning and bonny trim to recover high value clean ground product.

From the new ProMax3000 (300 kg / 660 lbs/hr / 73hp / 550kw) up to the game changing ProMax5000 (5000kg / 40,000+ lbs/hr / 735 hp / 700 kw), POSS offers machines to cover the full spectrum of processing volumes and separation applications.

With unmatched yields, due in part to our proprietary hydraulic Auto Restrictor, high through-puts, no pre-breaking, and unparalleled non-temperature rise and premium coarse ground texture in the recovered meat, can you really afford NOT to be running a POSS?

Ken Gulak
President

Ken Gulak President

Ken graduated from University of Western Ontario (London Ontario) in 1984 with an undergraduate degree majoring in Finance. Originally from Alberta, Ken worked in the Heavy Oil Industry prior to joining POSS as the Controller in 1988. Promoted to CM in 1996, Ken gradually assumed more responsibility at POSS until the founder, Warner Ross, sold the company to Shato Holdings in 2000, at which time Ken was promoted to President / CEO.

In 2003 Ken and his wife Sybil bought the company back from Shato, and began a steady pattern of growth that has seen the company expand its install base from 250 to over 1200 machines in 67 countries. Backed by a solid technical team and with a single focus on rotary extruder style separation, POSS has built an unparalleled reputation for meeting or exceeding its client's expectations worldwide across a wide range of mechanical separation applications.
